

LUBRICATED PISTON AIR COMPRESSORS

Our range of European Built Heavy Duty Piston compressors are designed to operate in the harshest of conditions where temperatures are often elevated. The design of the compressor allows for both the two stage 3 phase compressors and single phase single stage compressors to continue to operate in conditions where lesser quality units fail. Designed to operate 24 hours per day, the design of the advanced cooling system and quality control in Europe guarantees a compressor that will exceed expectations.

POWER SYSTEM PS7

7.5Hp INDUSTRIAL 3 PHASE PISTON COMPRESSOR (35cfm)

- Heavy Duty Cast Iron Pump Unit
- Large 270 Litre Air Receiver
- Slow RPM's
- 35cfm Piston Displacement
- 175 psi Maximum Pressure
- 2 Stage
- 2 cylinder
- Low Noise
- European Built
- Quality Components
- Drive Belt
- Heavy Duty Pressure Switch
- Positive Non Return Valve Unloader

POWER SYSTEM PS10

10Hp INDUSTRIAL 3 PHASE PISTON COMPRESSOR (50cfm)

- Heavy Duty Cast Iron Pump Unit
- Large 270 Litre Air Receiver
- Slow RPM's
- 50cfm Piston Displacement
- 175 psi Maximum Pressure
- 2 Stage
- 2 cylinder
- Low Noise
- European Built
- Quality Components
- Drive Belt
- Heavy Duty Pressure Switch
- Positive Non Return Valve Unloader
